DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 2, 4, 6-8, and 11-24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. It does not appear that applicant contemplated the alternating types of threads to have equivalent diameters. It is noted that in Figure 1 the threads are shown to have different diameters.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 4, 6, 8, 11-13, 15-18, and 20-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Espe (US 2001/0029139) in view of Kositzke (US 4909284) substantially as set forth in the last Office action.

Note that Kositzke teaches that the alternating fibers may be of differing strengths or compositions. This would be expected to result in differing elasticities in the fibers.

Claims 7, 14, and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Espe in view of Kositzke as applied to the claims above, and further in view of Douglas (US 5855733) substantially as set forth in the last Office action.

Response to Arguments

Applicant's arguments filed December 12, 2006, have been fully considered but they are not persuasive. Applicant argues that the claims now require the threads to have generally equal sheath and thread diameters. This does not appear to be commensurate in scope with the claims. Note the rejection of the claims under 35 USC 112, first paragraph set forth above.

In response to applicant's argument that Kositzke is nonanalogous art, it has been held that a prior art reference must either be in the field of applicant's endeavor or, if not, then be reasonably pertinent to the particular problem with which the applicant was concerned, in order to be relied upon as a basis for rejection of the claimed invention. See *In re Oetiker*, 977 F.2d 1443, 24 USPQ2d 1443 (Fed. Cir. 1992). In this case, a person having ordinary skill in the art would have appreciated that forming a fabric with alternating thread patterns as taught by Kositzke would have been expected to provide enhanced abrasion resistance on the wear surface.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 1771

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
